

Le secret du dé1. Les différentes faces :

a.) A gauche et à droite :

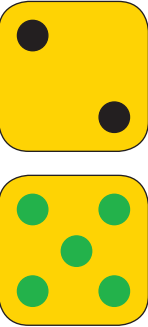

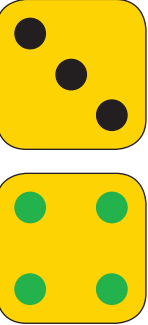

$$6 + \underline{1} = \underline{7}$$

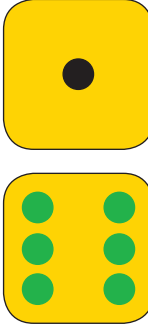

$$5 + \underline{2} = \underline{7}$$

$$4 + \underline{3} = \underline{7}$$

b.) AU-dessus et en-dessous :

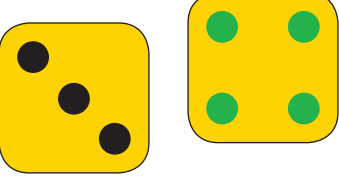

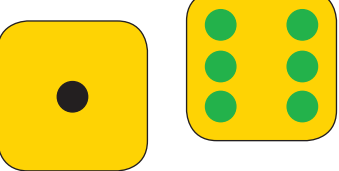

$$2 + \underline{5} = \underline{7}$$

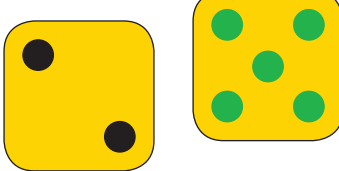

$$3 + \underline{4} = \underline{7}$$

$$1 + \underline{6} = \underline{7}$$

c.) Devant et derrière :

$$3 + \underline{4} = \underline{7}$$

$$1 + \underline{6} = \underline{7}$$

$$2 + \underline{5} = \underline{7}$$
Le secret :

Si on prend les points des cotés devant et derrière, on arrive à un total de 7.

Si on prend les points du dessus et du dessous, on arrive à un total de 7.

Si on prend les points des côtés droit et gauche, on arrive à un total de 7.

-> Les côtés qui sont parallèles entre eux, ont toujours un total de points qui font 7 !
