

Les Divisions1. Divise et contrôle le résultat suivant l'exemple :

$$12 : 3 = 4 \text{ , car } 4 \times 3 = 12$$

$$8 : 4 = \underline{2} \text{ , car } \underline{2 \times 4 = 8}$$

$$16 : 4 = \underline{4} \text{ , car } \underline{4 \times 4 = 16}$$

$$32 : 4 = \underline{8} \text{ , car } \underline{8 \times 4 = 32}$$

$$20 : 4 = \underline{5} \text{ , car } \underline{5 \times 4 = 20}$$

$$28 : 4 = \underline{7} \text{ , car } \underline{7 \times 4 = 28}$$

$$12 : 3 = \underline{4} \text{ , car } \underline{4 \times 3 = 12}$$

$$30 : 3 = \underline{10} \text{ , car } \underline{10 \times 3 = 30}$$

$$21 : 3 = \underline{7} \text{ , car } \underline{7 \times 3 = 21}$$

$$15 : 3 = \underline{5} \text{ , car } \underline{5 \times 3 = 15}$$

$$24 : 3 = \underline{8} \text{ , car } \underline{8 \times 3 = 24}$$

$$0 : 6 = \underline{0} \text{ , car } \underline{0 \times 6 = 0}$$

$$42 : 6 = \underline{7} \text{ , car } \underline{7 \times 6 = 42}$$

$$54 : 6 = \underline{9} \text{ , car } \underline{9 \times 6 = 54}$$

$$18 : 6 = \underline{3} \text{ , car } \underline{3 \times 6 = 18}$$

$$36 : 6 = \underline{6} \text{ , car } \underline{6 \times 6 = 36}$$

$$28 : 7 = \underline{4} \text{ , car } \underline{4 \times 7 = 28}$$

$$56 : 7 = \underline{8} \text{ , car } \underline{8 \times 7 = 56}$$

$$14 : 7 = \underline{2} \text{ , car } \underline{2 \times 7 = 14}$$

$$42 : 7 = \underline{6} \text{ , car } \underline{6 \times 7 = 42}$$

$$63 : 7 = \underline{9} \text{ , car } \underline{9 \times 7 = 63}$$

2. Et on continue les exercices !

$$16 : 8 = \underline{2}$$

$$20 : 10 = \underline{2}$$

$$45 : 5 = \underline{9}$$

$$27 : 9 = \underline{3}$$

$$40 : 8 = \underline{5}$$

$$50 : 10 = \underline{5}$$

$$30 : 5 = \underline{6}$$

$$63 : 9 = \underline{7}$$

$$72 : 8 = \underline{9}$$

$$80 : 10 = \underline{8}$$

$$15 : 5 = \underline{3}$$

$$81 : 9 = \underline{9}$$

$$24 : 8 = \underline{3}$$

$$30 : 10 = \underline{3}$$

$$0 : 5 = \underline{0}$$

$$36 : 9 = \underline{4}$$

$$64 : 8 = \underline{8}$$

$$90 : 10 = \underline{9}$$

$$20 : 5 = \underline{4}$$

$$18 : 9 = \underline{2}$$

$$56 : 8 = \underline{7}$$

$$70 : 10 = \underline{7}$$

$$5 : 5 = \underline{1}$$

$$45 : 9 = \underline{5}$$

$$32 : 8 = \underline{4}$$

$$40 : 10 = \underline{4}$$

$$35 : 5 = \underline{7}$$

$$72 : 9 = \underline{8}$$

3. Pour chaque réponse juste, tu obtiens 1 point.

$$5 \times 6 = \underline{30}$$

$$10 : 2 = \underline{5}$$

$$30 : 10 = \underline{3}$$

$$36 : 4 = \underline{9}$$

$$27 : 3 = \underline{9}$$

$$9 \times 7 = \underline{63}$$

$$72 : 9 = \underline{8}$$

$$2 \times 4 = \underline{8}$$

$$63 : 9 = \underline{7}$$

$$4 \times 7 = \underline{28}$$

$$15 : 3 = \underline{5}$$

$$8 \times 8 = \underline{64}$$

$$3 \times 9 = \underline{27}$$

$$8 \times 5 = \underline{40}$$

$$7 \times 5 = \underline{35}$$

$$56 : 8 = \underline{7}$$

$$3 \times 2 = \underline{6}$$

$$40 : 4 = \underline{10}$$

$$45 : 5 = \underline{9}$$

$$90 : 9 = \underline{10}$$

$$5 \times 5 = \underline{25}$$

$$6 \times 3 = \underline{18}$$

$$5 \times 4 = \underline{20}$$

$$0 : 8 = \underline{0}$$

$$7 \times 9 = \underline{63}$$

$$24 : 8 = \underline{3}$$

$$2 \times 9 = \underline{18}$$

$$28 : 4 = \underline{7}$$

$$32 : 4 = \underline{8}$$

$$21 : 7 = \underline{3}$$
