

Les dizaines supérieures

1. Calcule d'abord pour arriver à la dizaine supérieure :

$$14 + 9 = 23$$

$$14 + 6 = 20 + 3 = 23$$

$$17 + 5 = 17 + 3 + 2 = 22$$

$$16 + 9 = 16 + 4 + 5 = 25$$

$$14 + 10 = 14 + 6 + 4 = 24$$

$$18 + 6 = 18 + 2 + 4 = 24$$

$$15 + 9 = 15 + 5 + 4 = 24$$

$$17 + 9 = 17 + 3 + 6 = 26$$

$$14 + 7 = 14 + 6 + 1 = 21$$

$$19 + 7 = 19 + 1 + 6 = 26$$

$$16 + 5 = 16 + 4 + 1 = 21$$

$$13 + 8 = 13 + 7 + 1 = 21$$

2. Calcule d'abord pour arriver à la dizaine inférieure :

$$24 - 7 = 17$$

$$24 - 4 = 20 - 3 = 17$$

$$21 - 6 = 21 - 1 - 5 = 15$$

$$24 - 8 = 24 - 4 - 4 = 16$$

$$27 - 9 = 27 - 7 - 2 = 18$$

$$22 - 5 = 22 - 2 - 3 = 17$$

$$26 - 7 = 26 - 6 - 1 = 19$$

$$23 - 9 = 23 - 3 - 6 = 14$$

$$25 - 7 = 25 - 5 - 2 = 18$$

$$28 - 10 = 28 - 8 - 2 = 18$$

$$22 - 8 = 22 - 2 - 6 = 14$$

$$21 - 7 = 21 - 1 - 6 = 14$$

3. Opérations diverses :

$$15 + 7 = 15 + 5 + 2 = 22$$

$$25 - 9 = 25 - 5 - 4 = 16$$

$$21 - 5 = 21 - 1 - 4 = 16$$

$$17 + 6 = 17 + 3 + 3 = 23$$

$$23 - 8 = 23 - 3 - 5 = 15$$

$$22 - 9 = 22 - 2 - 7 = 13$$

$$12 + 9 = 12 + 8 + 1 = 21$$

$$24 - 8 = 24 - 4 - 4 = 16$$

$$16 + 6 = 16 + 4 + 2 = 22$$

$$18 + 9 = 18 + 2 + 7 = 27$$
