

Triangle de calculs

Complète avec les chiffres de 1 à 9 de manière à obtenir le même résultat à chaque sommet du triangle.

The image contains three magic triangle puzzles, each with a target sum at its three vertices. The triangles are composed of 10 squares arranged in four rows: 1 square in the top row, 2 in the second, 3 in the third, and 4 in the bottom. The target sums are indicated in circles at the vertices.

- Top Triangle:** Target sum is 30. The top square is empty. The two squares in the second row are empty. The four squares in the third row are empty. The four squares in the bottom row are empty.
- Middle Triangle:** Target sum is 15. The top square is empty. The two squares in the second row are empty. The four squares in the third row are empty. The four squares in the bottom row are empty.
- Bottom Triangle:** Target sum is 40. The top square is empty. The two squares in the second row are empty. The four squares in the third row are empty. The four squares in the bottom row are empty.
