

$\frac{1}{4}$

Les fractions pour débutants

 $\frac{3}{5}$ $\frac{4}{7}$ $\frac{1}{2}$ $\frac{8}{9}$

Exemple

$$\frac{2}{4} + \frac{3}{4} = \frac{5}{4} \text{ simplifié} = \boxed{1} \frac{1}{4}$$

$$\frac{3}{6} + \frac{5}{6} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{1}{2} + \frac{4}{2} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{9}{8} + \frac{9}{8} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{4}{5} + \frac{3}{5} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{3}{9} + \frac{10}{9} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{7}{6} + \frac{9}{6} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$

$$\frac{4}{2} + \frac{7}{2} = \frac{\quad}{\quad} \text{ simplifié} = \boxed{\quad} \frac{\quad}{\quad}$$
