

Vermenigvuldigen: de tafel van 41. Omcirkel steeds 4 stuks:

$$32 = \underline{8} \times 4$$

$$16 = \underline{4} \times 4$$

$$24 = \underline{6} \times 4$$

2. Reken uit en controleer aansluitend:

$$4 \text{ in } 32 = \underline{8} \text{ keer, omdat } \underline{8} \times 4 = 32$$

$$4 \text{ in } 12 = \underline{3} \text{ keer, omdat } \underline{3} \times 4 = 12$$

$$4 \text{ in } 24 = \underline{6} \text{ keer, omdat } \underline{6} \times 4 = 24$$

$$4 \text{ in } 20 = \underline{5} \text{ keer, omdat } \underline{5} \times 4 = 20$$

$$4 \text{ in } 40 = \underline{10} \text{ keer, omdat } \underline{10} \times 4 = 40$$

$$4 \text{ in } 36 = \underline{9} \text{ keer, omdat } \underline{9} \times 4 = 36$$

$$4 \text{ in } 8 = \underline{2} \text{ keer, omdat } \underline{2} \times 4 = 8$$

$$4 \text{ in } 16 = \underline{4} \text{ keer, omdat } \underline{4} \times 4 = 16$$

3. Delen door vier en controleer aansluitend:

$$24 : 4 = \underline{6} \text{ , want } \underline{6} \times 4 = 24$$

$$16 : 4 = \underline{4} \text{ , want } \underline{4} \times 4 = 16$$

$$8 : 4 = \underline{2} \text{ , want } \underline{2} \times 4 = 8$$

$$4 : 4 = \underline{1} \text{ , want } \underline{1} \times 4 = 4$$

$$20 : 4 = \underline{5} \text{ , want } \underline{5} \times 4 = 20$$

$$40 : 4 = \underline{10} \text{ , want } \underline{10} \times 4 = 40$$

$$12 : 4 = \underline{3} \text{ , want } \underline{3} \times 4 = 12$$

$$32 : 4 = \underline{8} \text{ , want } \underline{8} \times 4 = 32$$

4. Vergelijk de uitkomsten en vul de symbolen >, < en = in:

$$3 \times 4 \text{ } \left( \leftarrow \right) \text{ } 14$$

$$1 \times 4 \text{ } \left( \leftarrow \right) \text{ } 5$$

$$2 \times 4 + 7 \text{ } \left( \leftarrow \right) \text{ } 17$$

$$6 \times 4 \text{ } \left( = \right) \text{ } 8 \times 3$$

$$8 \times 4 \text{ } \left( \rightarrow \right) \text{ } 29$$

$$7 \times 4 \text{ } \left( \rightarrow \right) \text{ } 26$$

$$5 \times 4 + 12 \text{ } \left( \rightarrow \right) \text{ } 31$$

$$10 \times 4 \text{ } \left( \leftarrow \right) \text{ } 9 \times 5$$

$$2 \times 4 \text{ } \left( \leftarrow \right) \text{ } 11$$

$$9 \times 4 \text{ } \left( \leftarrow \right) \text{ } 38$$

$$9 \times 4 - 5 \text{ } \left( \rightarrow \right) \text{ } 29$$

$$3 \times 4 \text{ } \left( \leftarrow \right) \text{ } 7 \times 2$$

$$10 \times 4 \text{ } \left( \rightarrow \right) \text{ } 39$$

$$5 \times 4 \text{ } \left( \rightarrow \right) \text{ } 18$$

$$7 \times 4 + 14 \text{ } \left( \rightarrow \right) \text{ } 38$$

$$8 \times 4 \text{ } \left( \rightarrow \right) \text{ } 9 \times 3$$

$$4 \times 4 \text{ } \left( = \right) \text{ } 16$$

$$6 \times 4 \text{ } \left( \rightarrow \right) \text{ } 23$$

$$4 \times 4 - 7 \text{ } \left( = \right) \text{ } 9$$

$$1 \times 4 \text{ } \left( = \right) \text{ } 2 \times 2$$

5. Vervolledig de vieren reeks:

Valt je iets op? Vergelijk de bovenste rij met de onderste. Wat is hetzelfde? En waarom is dat zo?
