

Het vereenvoudigen van breuken

Vereenvoudigen: Er ontstaan minder delen, daarvoor echter grotere. De totale grootte blijft gelijk.

$$\frac{6}{12}$$

$$\frac{2}{4}$$

$$\frac{1}{2}$$

Vereenvoudig!

$$\frac{3}{12} =$$

$$\frac{25}{100} =$$

$$\frac{16}{32} =$$

$$\frac{37}{9} =$$

$$\frac{8}{14} =$$

$$\frac{3}{9} =$$

$$14 \frac{24}{72} =$$

$$\frac{88}{8} =$$

$$\frac{5}{4} =$$

$$\frac{23}{8} =$$

$$\frac{23}{46} =$$

$$1 \frac{16}{9} =$$

$$\frac{250}{50} =$$

$$\frac{12}{3} =$$

$$\frac{15}{90} =$$

$$\frac{13}{4} =$$

$$\frac{105}{15} =$$

$$\frac{12}{39} =$$

$$1 \frac{20}{4} =$$

$$\frac{68}{34} =$$

Met welk getal werd hier vereenvoudigd?

Wordt hier eerlijk gedeeld?
