

**BREUKEN OP DE GETALLENLIJN**Welke breuken zijn op de getallenlijn gemarkeerd?

$$A = \underline{\frac{2}{4}} \quad B = \underline{\frac{5}{4} = 1\frac{1}{4}} \quad C = \underline{\frac{8}{4} = 2}$$

$$A = \underline{\frac{1}{8}} \quad B = \underline{\frac{4}{8}} \quad C = \underline{\frac{6}{8}}$$

$$A = \underline{\frac{3}{10}} \quad B = \underline{\frac{9}{10}} \quad C = \underline{\frac{15}{10} = 1\frac{5}{10}} \quad D = \underline{\frac{22}{10} = 2\frac{2}{10}}$$

$$A = \underline{\frac{2}{6}} \quad B = \underline{\frac{6}{6} = 1} \quad C = \underline{\frac{8}{6} = 1\frac{2}{6}} \quad D = \underline{\frac{11}{6} = 1\frac{5}{6}}$$

Zet de volgende breuken op de getallenlijn om in gemengde breuken!Denk na over welke getallenlijn je dient te gebruiken!

$$a.) \frac{4}{3} = \underline{1\frac{1}{3}} \quad b.) \frac{12}{10} = \underline{1\frac{2}{10}} \quad c.) \frac{8}{3} = \underline{2\frac{2}{3}} \quad d.) \frac{18}{10} = \underline{1\frac{8}{10}}$$

$$e.) \frac{20}{10} = \underline{2} \quad f.) \frac{7}{3} = \underline{2\frac{1}{3}} \quad g.) \frac{23}{10} = \underline{2\frac{3}{10}} \quad h.) \frac{3}{3} = \underline{1}$$
